

### Clinical Laboratory Assistant (CLA) Full-time, 9am-5pm (M-F)

We are searching for a clinical laboratory assistant (CLA) to join Machaon Diagnostics for a unique opportunity. You will be working in a state-of-the-art clinical laboratory that is internationally recognized for its expertise in thrombosis and hemostasis. The position involves the performance of various laboratory duties, which may include sample processing, database entry, glassware/dish ware washing, restocking reagents, restocking supplies, temperature monitoring and other general tasks at the discretion of the laboratory director. We expect to train the hired candidate in most, if not all, of these testing techniques.

Candidates with science degrees (chemistry, biochemistry, molecular and cell biology, medical technology, CLS, etc.) AND 1-2 years of post-baccalaureate laboratory experience are welcome to apply.

Machaon is a fun, fast-paced and challenging environment that delivers specialized clinical lab testing services to doctors and hospitals and conducts contract research/clinical trials for the pharmaceutical and biotech industries. Machaon Diagnostics was founded by a coagulation scientist and we invite you to learn from his entrepreneurial and scientific approach to improving healthcare one disease at a time.

Our clients include pharmaceutical firms, biotech companies, and medical centers located at Stanford, Mayo Clinic, UCSF, Mass General, UCLA, etc.

There is a demanding knowledge base that must be maintained, requiring the candidate to proactively and quickly learn many policies and procedures.

This job is for the select few serious candidates that are high-energy, uniquely detail-oriented and meticulous in record keeping. If you are keenly interested in advancing your scientific knowledge base, as well as your understanding of healthcare delivery in the US, we invite you to apply.

Please send your CV and a list references in PDF format when applying for this position. To apply e-mail: [jobs@machaondiagnosics.com](mailto:jobs@machaondiagnosics.com).

Machaon Diagnostics is a 12-year-old laboratory firm that is accredited by the College of American Pathologists (CAP) and CLIA and licensed by the State of California. We are experts in hemostasis, thrombosis, immunology, special chemistry, platelet physiology/function, molecular diagnostics, and next-generation sequencing assays.

The laboratory is located on a hospital campus in the sunny San Francisco East Bay, just 11 miles from downtown San Francisco.
