

Machaon's Sponsored Testing Programs Summary

We have assembled a collection of endowments, non-profits (501c3), patient support programs and industry partners to help patients and patient families obtain **free** (or very low cost) medically necessary specialized testing. Machaon's Patient Advocates navigate the programs for patients to see if they are eligible. The process is fast and easy.

Tests included in the program: (Version: 01JUN2023)

- | | |
|---|---|
| 1. aHUS Genetic Panel | 6. Anti-CFH Antibody |
| 2. TMA-Complete Genetic Panel | 7. sC5b-9 Levels |
| 3. C3G Genetic Panel | 8. Hypophosphatasia (HPP)/OI Genetic Panel |
| 4. C3 Nephritic Factor | 9. ADAMTS13 testing (launching 24JUN2023) |
| 5. CFH Fusion and CFHR Del/Dup Testing | 10. Coming soon: inquire about your test |

(Note: we are adding to this list actively, so check back in with us to learn how it has expanded.)

The Process Outlined:

1. Call, e-mail or fax Machaon Diagnostics with the patient's demographics, ICD-10 code(s), and the name of test(s) being ordered.
2. Tell the patient that a **Machaon Patient Advocate** will be phoning them within 1 business day to verify eligibility.
3. **96% of patients are eligible** and approved following a 5-minute phone call with a Machaon Patient Advocate.
4. Note: screening of eligibility preferably occurs prior to sample collection.
5. Eligible patients are approved same-day for a 30-day conditional approval.
6. *It's important that the patient takes our call! We will be calling from a 510 or 800 area code.*
7. This program removes financial barriers for patients trying to access specialized lab testing.
8. Need shipping kits? Please call or email kits@machaondiagnosics.com.

Thank you,

Machaon Patient Advocates
